MR. J. E. HAMLEY:

Reference is made to cars for refrigerator service:

It is my understanding that only the 25 blue and gold cars of the 11500 series would be used for refrigerator service, and that the yellow refrigerator cars would be used in general freight service, unless required for refrigerator service; racks to remain in all cars.

I think it would be less confusing to have some of the yellow cars and some of the blue and gold cars in refrigerator service.

Please advise.
